Infectious patient in the imaging unit

Yellow sticker on the animal and on the examination request

Reception

Inform an IMA technician as soon as possible

Technician

Prepare the room before the animal arrives

Plan an almost filled yellow bin

Prepare the disposable aprons needed and plastic bags for the ultrasound pillow

At the end of the examination: clean and disinfect the room and the equipment, following the instructions

Seal the yellow bin and bring it in the bunker (courtyard B41)

Ultrasound Small Animal classes III and IV

People in the room wear a disposable apron and gloves

Ultrasound Small Animals : protect the pillow with two plastic bags, undersheets on bags, ultrasound probe in a glove, people handling the animal will not touch the ultrasound, or will do it with the other hand.

Animal faeces and urine in the yellow bin

After examination: dispose of aprons and gloves in the yellow bin

Wash your hands and disinfect them with the hydroalcoholic solution
