

Infectious animal in the Imaging unit

Yellow plaster on the animal and on the examination request

Reception

Inform an IMA technician as soon as possible

Technician

Prepare the room before the animal arrives: plastic bags, undersheets

Plan an almost filled yellow bin

Prepare the disposable aprons needed

At the end of the examination: clean and disinfect the room and the equipment, following the instructions

Seal the yellow bin and bring it in the bunker (courtyard B41)

X-ray Large Animals class III

People in the room wear a disposable apron (above the lead apron) and gloves

X-ray Large Animals: undersheets on the cassette or cassette wrapped in a plastic bag if it comes into contact with the animal; people handling the animal do not handle the cassette, the console, etc.

Animal faeces and urine in the yellow bin

After examination: dispose of aprons and gloves in the yellow bin

Wash your hands and disinfect them with the hydroalcoholic solution
